## DOS Group transfers rescue applications and part of company to Rega

DOS Group, based in Ticino, is selling their rescue applications and part of the company to Rega.

DOS Group, a Mendrisio-based company, has sold its Momentum, ArvaDOS and DriveOnStreet software products and the associated part of the company to Swiss Air Rescue Rega. Momentum is a rescue and emergency alert and situational awareness application that is, since several years, operated with great success in 16 Swiss cantonal and numerous other rescue organisations. Since last year, Rega's operations centre has been using an enhanced version of the Momentum software to alert mountain rescuers from the Swiss Alpine Club (CAS), commonly referred to as Alpine Rescue Switzerland (ARS), to support helicopter crews in rescue missions conducted in difficult terrain.

In the future, the related DOS Group software products will be further developed by the same development team in a company that has been specifically established by Rega in Ticino called sureVIVE SA, having the same corporate headquarters as DOS Group.

DOS Group shareholders Stefano Doninelli and Colombo & Partners SA are very pleased with this agreement. Mr. Stefano Doninelli remains the sole shareholder of DOS Group.

The founder and Chairman of the DOS Group Board of Directors, Stefano Doninelli, who is also active in the mountain rescue sector and an innovator for rescue solutions, will in the future also be a member of the Board of Directors and responsible for innovation at sureVIVE SA, in addition to holding the role of President and Chief Innovation Officer of DOS Group. DOS Group will continue to focus on its core business, which is the provision of IT solutions and services to corporate clients in various industries.

### About DOS Group

Founded in 2001 in Arzo, DOS Group has, within a few years, strengthened its services in the IT sector, adding consultancy for complex IT infrastructures and datacentre services to the resale of computers and printers. In 2006, DOS Group started providing software development services, thereby establishing its very active customised applications department and, in 2014, additionally added the Momentum solution to its portfolio, which was successfully adopted by numerous rescue organisations throughout Switzerland and successfully transferred to Rega in 2022.
